Asset Building

Asset Building is a powerful way to help your little succeed in life. There are 40 Developmental Assets that give young people the strength they need to make positive choices in life even when they face stress & pressure. You are already helping to build assets in your child's/Little's life.

Asset of the Month

Social Competence: Have family meetings where children have a voice in decision making.

**Did you know?
March is Red Cross Month!**

By choosing to donate, you are playing an important role in protecting the health of people in your community. In fact, chances are you or one of your family members will need blood or a blood product at some time in life. There are several types of blood donation that can ensure the right blood product is available when needed.
